Comment. The report confirms information according to which elements of the 25th Tank Div from the area of the concentration camp were transferred to Templin and the vacated billeting area was reoccupied by the KVID Grossenhain. The present report indicates that the transfer of the 25th Tank Div was generally completed on 6 Parch. The concentration camp as well as the Panzer Kaserne were apparently no longer occupied by the division. The wheeled elements of the division probably moved to Templin by road, with the unidentified rotor transportation battalion of the division, commanded by Lieutenant Colonel Markin (fnu), engaged in the hauling of the billeting equipment.

SECRET,
